Manifesto

Recovering from the pandemic with a New Green Deal in Italy

The new Coronavirus pandemic is disrupting the habits and ways of life of billions of people. It is causing thousands of deaths as well as a huge economic downturn. The pandemic has unveiled our vulnerability, our lack of preparation and resilience in front of this kind of risks: in other words, it has unveiled the need to take more care of our future.

We believe that, in order to face such a destructive crisis and to open concrete opportunities for a better future, broad, innovative and far-reaching policies are required. We need an unprecedented public intervention – both national and European – in the economy, as well as an extraordinary commitment from citizens and businesses. This will only be possible as long as we share proper awareness, a common vision, and clear decisions towards a new kind of development model that is able to meet the challenges of our time.

While implementing measures to make our societies, our health systems and our economies more resilient towards pandemics, other challenges threatening our future should not be overlooked or, even worse, spread. First of all, the major climate crisis, that is caused by a linear economic model with high consumption of fossil fuels and high waste of natural resources. Our extraordinary effort must aim for a sustainable development, that ensures higher employment and a larger and more equally-distributed wellbeing based on a decarbonized and circular economy.

The European Recovery Plan - that aims at triggering robust European funding, with a more active role of the European Investments Bank, an increased European budget, and common financial instruments to raise additional capitals on the market- in the context of the actual crisis, should reestablish and revive the ambitious European project for an advanced, decarbonized and circular economy.

We believe that a new Green Deal is the right way to reach a strongest and long-lasting recovery, unlocking the best potentialities of our Country. The potentiality of *quality* productions, that are increasingly green and inseparable from the decarbonization and circularity of production, distribution, and consumption patterns. The potentiality of sectors of excellence, such as waste management, a main pillar of *circular economy*, and energy efficiency and renewable energy sources, that are key for a carbon neutral economy. The potentiality of the *sustainable agriculture* model, that is strategic for food safety, and of the other *regenerative bioeconomy* activities, that are able to revitalize marginal areas and disused sites. The potentiality of cities, that need to be boosted with a broad plan for green urban regeneration. The potentiality of the substantial natural capital, that is necessary for many ecosystem services and for the revival of many economic activities such as tourism. The potentiality of a low-carbon and alternative-fuel transition towards a more decarbonized, electric and shared mobility. The potentiality of *digital innovation*, that could contribute to improve our work, study, and healthcare, while reducing our ecological footprint.

Economic stimulus packages must not increase GHG emissions or worsen environmental impacts, thus shifting additional costs to our future.

We believe that a new Green Deal is the innovative way forward for the economic renaissance of Italy.

First 110 representatives of companies and business organizations supporting the Manifesto Recovering from the Pandemic with a New Green Deal in Italy

Giorgio Arienti (Ecodom), Alessandra Astolfi (Ecomondo - Italian Exhibition Group), Alessandra Barocci (Acciaieria Arvedi Spa), Catia Bastioli (Novamont), Luca Maria Bettonte (ERG), Renato Boero (Iren), Davide Bollati (Davines), Fabrizio Bolzoni (Legacoop produzione e servizi), Danilo Bonato (Consorzio Remedia), Filippo Brandolini (Gruppo Hera), Michaela Castelli (ACEA), Massimo Centemero (CIC), Maria Paola Chiesi (Chiesi Farmaceutici), Antonello Ciotti (Corepla), Simona Comandé (Philips Italia), Giovanni Corbetta (Ecopneus), Matteo Del Fante (Poste Italiane), Luigi Ferraris (Terna), Andrea Fluttero (Unicircular), Andrea Illy (Illycaffè), Antonio Lazzarinetti (Itelyum), Girolamo Marchi (Federazione Carta e Grafica), Graziano Marcovecchio (Assovetro), Stefano Masini (Coldiretti), Alessio Miranda (ING Italia), Carlo Montalbetti (Comieco), Giancarlo Morandi (Cobat), Simone Mori (Elettricità Futura), Francesco Mutti (Mutti), Giorgio Quagliuolo (Conai), Edo Ronchi (Fondazione per lo sviluppo sostenibile), Roberto Sancinelli (Montello), Francesco Starace (ENEL), Simone Togni (ANEV), Paolo Tomasi (CONOU), Giovanni Valotti (Utilitalia), Francesco Vetrò (GSE), Enrico Zoppas (Acqua Minerale San Benedetto), Andrea Arzà (Assogasliquidi /Federchimica), Marco Peruzzi (E2i energie speciali), Gabriele Buia (ANCE), Andrea Gibelli (ASSTRA; Gruppo FNM), Ignazio Capuano (Burgo Group), Salvatore Barone (Castalia), Arnaldo Satanassi (CONIP), Tommaso Campanile (CONOE), Gianni Scotti (CoReVe), Pierroberto Folgiero (NextChem), Angelo Bruscino (Ambiente Spa), Marco Versari (Assobioplastiche), Walter Regis (Assorimap), Chicco Testa (FISE Assoambiente), Marisa Parmigiani (Fondazione Unipolis), Giovanni Battista Zorzoli (Coordinamento FREE), Bruno Rebollini (CDC RAEE), Marco Frey (Global Compact Network Italia), Roberto Cavallo (ERICA s.c.), Roberto Coizet (Edizioni Ambiente), Camillo Ricci (eprcomunicazione), Toni Volpe (Falck Renewables), Giovanni Teodorani Fabbri (FaterSMART), Roberto Callieri (Federbeton: Aitec), Eric Ezechieli (Nativa), Sebastiano Marinaccio (Mercatino Srl), Domenico Rinaldini (Ricrea), Nicola Semeraro (Rilegno), Luciano Pazzoni (Consorzio Carpi), Rossana Revello (Chiappe Revello Associati), Marco Salogni (Chiari Servizi Srl), Lucia Leonessi (Cisambiente), Chiara Bigioni (Cogedi), Saverio Cecchi (Confindustria Nautica), Marco Luigi Cipriano (CORE Spa), Mauro Grotto (AIRA), Susanna Martucci Fortuna (Alisea), Antonio Borbone (ANGAM), Valeria Erba (ANIT), Alessandro Andreanelli (Lush), Francesca Tramonto (Antonio Tramonto srl), Carlo Belvedere (ASCOMAC Cogena), Roberto Magnaghi (FIRI; Interseroh), Dario Soria (Assocostieri), Cinzia Vezzosi (Assofermet Metalli), Paolo Pozzato (Assofermet Rottami), Lucio Ponzanesi (Assogasmetano), Ezio Esposito (Assorem; Ecocentro tecnologia ambientali Spa), Walter Righini (FIPER), Dario Di Santo (FIRE), Pietro Negri (Forum per la finanza sostenibile), Isabella Goldmann (Goldmann&partners), Giuliano Dall'O' (Green Building Council Italia), Carlo Degano (Hill+Knowlton Strategies Italy), Sergio Andreis (Kyoto Club), Claudio Merazzi (ECODYGER srl), Enrico Ambrogio (EcoTyre), Nicolas Meletiou (ESO società benefit), Antonio Ferro (Extra), Ombretta Sarassi (OPEM), Enrico Morigi (Picozzi & Morigi), Emanuele Plata (PLEF), Stefano Bugliosi (PTSCLAS), Fabio Magnoni (Rampini), Virginio Trivella (Rete Irene), Mirella Vitale (Rockwool), Simonetta Lombardo (Silverback), Giuseppe Lanzi (Sisifo srl), Federico Garcea (Treedom), Alberto Canni Ferrari (CDCNPA), Alessia Scappini (Alia Servizi Ambientali), Antonella Mazzocchia (Fratelli Mazzocchia Spa)
