as a way of being not just operating

The
art & science
of packaging

Seda - A world of packaging

Every day, 100 million consumers hold in their hands a SEDA packaging

ICE CREAM

FOOD SERVICE

FOOD INDUSTRY

Sustainability is in our hands

We take care of the impact of our products in a full circle: from the concept idea until the end of life.

MATERIALS

- Reducing material use through pack design optimization
- Using sustainable and renewable materials

PROCESSES

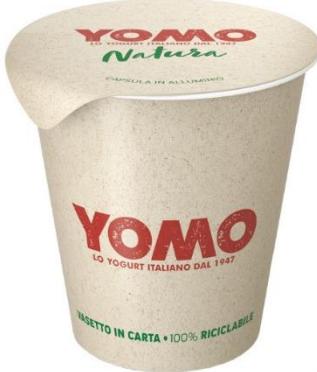

- Reducing Carbon Footprint through clean and efficient technology and production processes
- Our plants are all ISO 14001 certified, a standard which sets environmental objectives and targets

END OF LIFE

- Supporting packaging recycling and composting programs in Europe and North America
- Meeting Circular Economy Targets on packaging recycling

La proposta Seda: il vasetto in cartoncino

Nuovo Vasetto Sostenibile in Cartoncino Riciclabile

- Differenziazione di prodotto, sia visivo che tattile,
- Reassurance sulla sostenibilità tramite claim su Materiali e Fine Vita

Materiali

- ❖ Carta proveniente da foreste gestite in modo sostenibile (PEFC™)
- ❖ Composto da più dell'80% da cartoncino vergine
- ❖ La rimanente parte è LDPE comunemente utilizzato da altri imballaggi base carta

Processo Produttivo

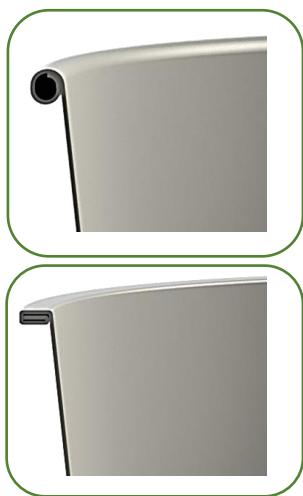

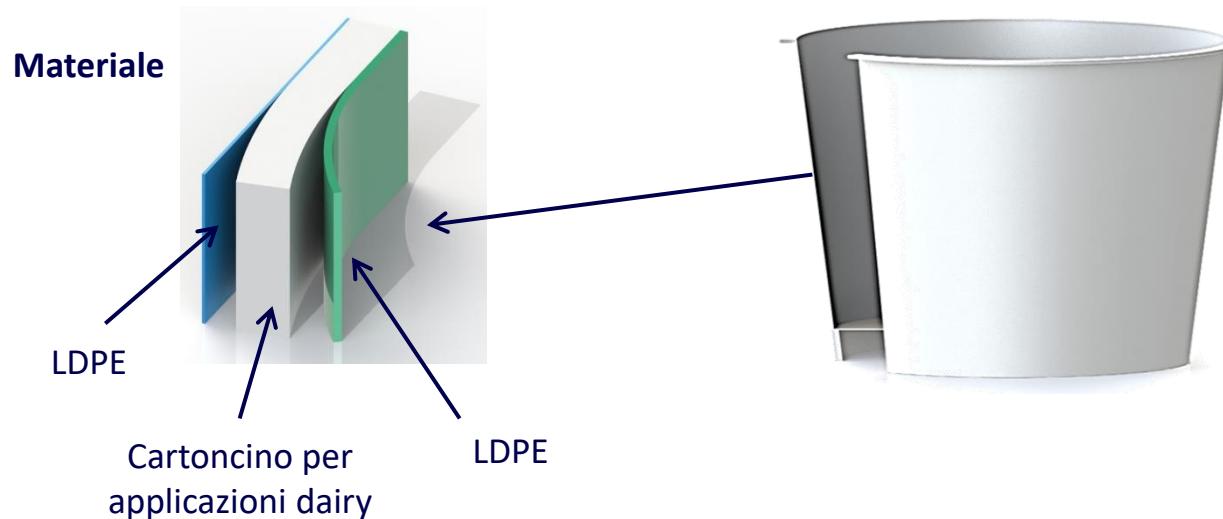

- ❖ Seda "Air Tight Technology"
- ❖ Vasetto con bordo piatto
- ❖ Seda "Edge Protection Technology"
- ❖ Processo produttivo molto efficiente per minimizzare le emissioni

Fine Vita

- ❖ Riciclabile con la raccolta carta
- ❖ Livello Aticelca: C
- ❖ Contributo CAC: da 560 euro/tons a 55 euro/tons

L'importanza del riciclo

Ogni vasetto correttamente riciclato avrà una seconda vita in quanto le fibre utilizzate rappresentano un materiale di grande valore.
